EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in this telephone interview with Attorney Mr. Mark D. Simpson on 01/20/06 and 01/23/06.
3. The claims have been amended as follows:
 1. (Currently amended) A user assistance system for providing user assistance in connection with selectable steps associated with the operation of a computer program running on a computer system, each of said selectable steps capable of being active or inactive, and each implementing one or more substeps when selected, with one of the selectable steps being a currently-selected step, said user assistance system comprising:
 - a client work area displaying information pertaining to the currently-selected step; and
 - a navigator bar adjacent to said client work area, said navigator bar continuously displaying a visual representation of said selectable steps, said visual representation including a display of steps that are active and steps that are inactive, said displayed steps comprising the most likely steps to be traversed in connection with the currently selected step;wherein said visual representation of said selectable steps displayed by said navigator bar further includes:
 - past steps already performed by said computer program; and

Art Unit: 2179

the currently-selected step;

wherein said navigator bar is scrollable to allow viewing of selectable steps preceding the currently selected step, wherein the action of scrolling said navigation bar does not change the information being displayed in said client work area.

2. (Previously presented) The user assistance system of claim 1, wherein said navigator bar is dividable into segments, with each segment corresponding to one of said steps of said selectable steps.

Claims 3-5 (Canceled)

6. (Currently amended) The user assistance system of claim [[1]] 2, wherein said segments include active segments and inactive segments, and wherein selection of an active segment changes the currently-selected step to the step corresponding to said selected active segment.

7. (Original) The user assistance system of claim 6, wherein said navigator bar displays said segments in a serial manner, and wherein said navigator bar can be scrolled to allow viewing of segments preceding or following said segment corresponding to said currently-selected step.

8. (Canceled)

9. (Currently amended) The user assistance system of claim [[8]] 1, wherein said information displayed in said client area comprises a selectable list of alternative choices for subsequent steps to be taken by said computer program.

10. (Previously presented) The user assistance system of claim 9, wherein selection of one of said alternative choices causes said display of future steps not yet performed by said computer program to change to a display of future steps associated with said selected alternative choice.

11. (Currently amended) A method for providing user assistance in connection with selectable steps associated with the operation of a computer program running on a computer system, each of said selectable steps capable of being active or inactive, and each implementing one or more substeps when selected, with one of the selectable steps being a currently-selected step, said method comprising the steps of:

generating a client work area in which information pertaining to the currently-selected step is displayed; and

generating a navigator bar adjacent to said client work area, said navigator bar continuously displaying a visual representation of said selectable steps, said visual representation including a display of steps that are active and steps that are inactive, said displayed steps comprising the most likely steps to be traversed in connection with the currently selected step;

wherein said visual representation of said selectable steps displayed by said navigator bar further includes:

Art Unit: 2179

past steps already performed by said computer program; and
the currently-selected step;
wherein said navigator bar is scrollable to allow viewing of selectable steps preceding the currently selected step, wherein the action of scrolling said navigation bar does not change the information being displayed in said client work area.

12. (Previously presented) The method of claim 11, further comprising the step of dividing said navigator bar into segments, with each segment corresponding to one of said steps of said selectable steps.

Claims 13-15 (Canceled)

16. (Currently amended) The method of claim ~~[[11]]~~ 12, wherein said segments include active segments and inactive segments, and wherein selection of an active segment changes the currently-selected step to the step corresponding to said selected active segment.

17. (Original) The method of claim 16, further comprising the steps of:
displaying said segments on said navigator bar in a serial manner; and
providing means for scrolling said navigator bar, wherein said navigator bar can be scrolled to allow viewing of segments preceding or following said segment corresponding to said currently-selected step.

18. (Canceled)

19. (Currently amended) The method of claim [[18]] 16, further comprising the step of displaying in said client area a selectable list of alternative choices for subsequent steps to be taken by said computer program.

Allowable Subject Matter

1. Claims 1-2, 6-7, 9-12, 16-17, and 19 are allowed.
2. The following is an examiner's statement of reasons for allowance in combination with other claim limitations:

Independent claims 1 and 11, when considered as a whole, are allowable over the Prior Art of record. Specifically, the Prior Art of record fails to teach that the client work area displaying information pertaining to the currently-selected step, the navigator bar adjacent to the client work area, the navigator bar continuously displaying the visual representation of the selectable steps, the visual representation including the display of steps that are active and steps that are inactive, wherein the visual representation of the selectable steps displayed by the navigator bar further includes the past steps already performed by said computer program and the currently-selected step, in addition, the navigator bar is scrollable to allow viewing of selectable steps preceding the currently selected step, and wherein the action of scrolling the navigation bar does not change the information being displayed in the client work area.
